

# **L.D. College of Engineering**

## **Information Technology Department**

### **Vision, Mission, PEO**

**20 November 2019**

#### **Vision**

To shape the minds of Information Technology students for sustainable technological and socio-economical growth of nation.

#### **Mission**

1. Bringing an innovative approach in the teaching-learning process to produce competent Information Technology engineers.
2. Provide opportunities and exposure to the young engineers to develop themselves as responsible professionals and researchers.
3. Infusing lifelong learning ability in the aspiring minds with the view of making them sensitive towards their social responsibilities.

#### **Programme Educational Objectives (PEOs)**

The Program Educational Objectives (PEOs) for the Information technology Engineering program describe accomplishments that graduates are expected to attain within five to seven years after graduation

1. Pursue a professional career in the field of Information Technology Engineering and excel in it.
2. Enhance their knowledge by continuing higher education and research.
3. Work as torch bearer in a multidisciplinary environment to bring innovation and to improvise the existing technology as entrepreneurs.
4. Keep pace with cutting edge scenario of the field with the view of contributing to the social and environmental needs in efficient ways.
