Syllabus

BACKLOG/REMEDIAL MID SEM EXAMINATION -2022

B. E. SEM-II (ALL BRANCH)

Sub: Mathematics-02 (3110015)

Exam Date: 08/07/2022 Time: 3:00 pm to 4:30 pm

Venue: Room No. 3006, Annexe Building

Vector Calculus: Parameterization of curves, Arc length of curve in space, Divergence, Curl, Fundamental theorem of line integrals, Conservative fields, Component test for conservative fields, Line Integral, Work done, Path independence, Potential function.

CO1

Fourier Integral: Fourier Integral, Fourier Cosine Integral and Sine Integral.

Laplace Transform : Definition of the Laplace transform, Inverse Laplace transform, Linearity, shifting theorem(first shifting), Transforms of derivatives and integrals Differential equations, Unit step function, Second shifting theorem,

CO2

Ordinary Differential Equations: First order differential equations, Exact differential equations, Integrating factor, Linear differential equations, Bernoulli equations.

CO3

Ordinary differential equations of higher order: Homogeneous linear ordinary differential equations of higher order, Homogeneous Linear ODEs with constant coefficients, Existence and uniqueness of solutions, Linear dependence and Independence of solutions, Wronskian, Nonhomogeneous ODEs.

CO4

Subject Coordinator

Head of Department
