Date: 16/03/2024

### ***Industrial Visit of eInfochips***

Information Technology Department of L. D. College of Engineering, Ahmedabad organized an Industrial Visit of Einfochips – an arrow company, Ahmedabad on 15/03/2024 (Friday) from 11:00 AM to 4:00 PM. Around 43 students of 4<sup>th</sup> and 6<sup>th</sup> Semester of IT branch along with four faculty members Dr. M. C. Parikh, Dr. P. R. Patel, Prof. A. C. Patel and Prof. J. B. Chavda took part in the visit. The visit was all about guiding students in the field of software testing and IoT technology. During this visit there were three sessions were delivered by experts from Einfochips as follows.

#### **❖ First session (Technical Capsule)**

The first session was taken by Mr. Anand Shah who is a project manager at Einfochips. This session was about Einfochip. Students were informed about the history of Einfochips and core services they are providing. Following are the four core domains in which they are providing solutions.

- Device Engineering
- Digital Engineering
- Quality Engineering
- Silicon Engineering

As Einfochips is the service-based company it is any service request which comes under the following four can be entertained at Einfochips. We were also informed about the importance of soft skills in our career, how soft skills play a great role in any sector. Another point that was noted by students was about how to make a good carrier in the dynamic field of IT.

After the session, we took a little break and had lunch together at the cafeteria of Einfochip.

### ❖ Second session (Experience Zone)

The second session was delivered to us by Ms.Garvita, who informed us about different projects that the company is currently working on with live hardware components and a demo of each product. Students were able to see more than 10 distinguished projects, there are more projects that the company is currently working on and these were some of them that we are informed about. Some of them were amazing, which caught the attention of many students. There were projects like portable sonography machines, mini hands-free recording cameras, home automation, and security gadgets, mega mall management appliances, and many more mesmerizing innovations.

### ❖ Third session (Software Testing)

The last and third session was taken by Mr. Paras Shah who was a very knowledgeable person in software testing and cyber security. Who guided students on the software testing field and how it is done in real-life scenarios. He also responded very positively to students' all questions with career guidance. For those students who are really interested in this field, he also gave them guidance personally. It was a very interactive session.
