

Report of Workshop conducted by IIT Gandhinagar

Recently, our college hosted an enriching two-day workshop conducted by IIT Gandhinagar for BE-IT fresher students. The workshop aimed to introduce basic science and mathematics concepts in an engaging and interactive manner.

On the first day, students were captivated by the unique approach of using various toys and activities to elucidate fundamental principles. These hands-on experiences not only made learning enjoyable but also helped solidify complex ideas through practical application and visual representation.

The second day of the workshop continued with an array of intriguing toys and puzzles, further stimulating the students' curiosity and problem-solving skills. These activities encouraged creative thinking and collaborative learning, as students worked together to tackle the challenges presented to them. The atmosphere was lively and filled with excitement as each new task brought fresh insights and discoveries.

The workshop culminated in a collective project where all the students participated in creating a string art representation of "IT DEPT." This activity not only fostered a sense of unity and teamwork but also allowed the students to express their creativity while reinforcing the concepts they had learned. The final artwork stood as a testament to their combined efforts and the knowledge gained over the two days, leaving everyone with a sense of accomplishment and a deeper appreciation for science and mathematics.
