

Hour Of code

“The final outcome of any task started with a vision of benefitting the society always proves to be fruitful”. The innovative idea “Hour Of Code” in which students of our college had to conduct a one hour session in various schools on the basic programming language like C and Html within a span of the given one month time i.e. from **20/1/18 to 20/2/18** has turned to be fruitful. The idea implemented with an aim of providing basic knowledge about computer programming and its applications to the school students so that their knowledge regarding computer field widens, understanding level increases and can become successful in future in this field if chosen as a career has reached to more than **3243** school students. With a few teams involved in this remarkable task, it grew to **27** teams with an involvement of approximately **88** members comprising of members of even 1st year. Our students covered **65** schools located in different areas of the city conducting a total of **79** sessions with 2 or 3 sessions per team with an involvement of **40-45** or even more students in a single session. This initiative of Innovator Club proved to be a great success only due to the best efforts put by our students in this task. Many positive feedbacks have come to us and also words of appreciation from other colleges indicating the achievement of our Goal. We would try our best to continue such work in future and coming up with many new innovative ideas.
