

Expert Lecture on “Polymeric Materials” in Chemical Engineering Department

Mr Ankit Mishra, Christian Albrechts University of Kiel, Germany, has delivered an online lecture on “Polymeric Material” on 14th August 2020. 3rd sem students have taken the benefit of the same. Overall coordination was done by Dr Anjali Bishnoi.

During his talk, he briefed about the polymer, their structure, unique properties of polymer and their various applications. He enlightened the applications of polymeric material in day to day routine life and also explained the role of the same in space applications. Overall it was a very interesting, informative and knowledge gaining session.
