

Expert Lecture on *“Industrial Wastewater Treatment”*

Mr Kaushik Solanki, Technical Sales Manager, Mazda Ltd. delivered a lecture on “Industrial Wastewater Treatment” on 5th March 2022. Around 30 students of BE 4th semester and ME 4th semester students were present in the session. Overall coordination was done by Dr S. M. Dutta and Prof. T. S. Rajaraman.

During the talk, Mr Kaushik discussed various aspects of wastewater treatment technologies and the rising need to find better alternatives in the treatment technology in today's world. He also explained the role of Mazda Ltd. in the design and product development fields. Additionally, the session was made interactive with career related suggestions for the students and the role of chemical engineers in the outside world. Students raised queries related to career and other fundamental aspects in chemical engineering.
