# **VISIT TO MUNDRA**

# OUR JOURNEY TO ADANI

MARCH 2023

We commenced our journey to Mundra at 5:00 AM and arrived at our destination at 1:00 PM. Following lunch, we were escorted to the Adani port, where we were given a tour of the cargo loading and import/export areas at Mundra. Subsequently, we were presented with a model demonstrating the evolution of the port and its expansion over time. Afterward, we were escorted to Adani's oil manufacturing plant where we were given a tour of the various types of edible oils and how they are produced, cooled, and packaged. That evening, we participated in a small event where we engaged in fun activities and performed garba.

# DAY-2

The following day began with breakfast, after which we visited Adani's petrochemical facility at the port and power plant. During our visit, we received information on the plant's construction and its characteristics. Our excursion concluded with a feedback session, and we arrived at our destination at 10:00 PM. It was a delightful experience to visit these remarkable ports with our college friends, which is surely a once-in-a-lifetime opportunity. Lastly, we extend a heartfelt thank you to the folks at Mundra for being wonderful hosts, and to our professors for their unwavering support.
