

Prof. V.M. Dholakiya mentored Team Acenthis, comprising students from Electrical and Electronics & Communication Engineering, under the LDCE Aarambh Cell as part of the Student Startup and Innovation Policy (SSIP) initiative. The team worked on developing a Proof of Concept (PoC) in the field of 3D reconstruction with digital cameras, which showcased advanced innovation and practical application. This mentorship played a pivotal role in refining their technical and entrepreneurial skills, culminating in the emergence of their project as a Department for Promotion of Industry and Internal Trade (DPIIT)-recognized startup. In July 2022, the startup, Zevien Technologies Private Limited, was officially established, marking a significant milestone for the students and the institution's innovation ecosystem.
