IEI CLUB ORIENTATION REPORT

21 February 2024

The Institution of Engineers (India) or IEI is a professional body in India established to promote and advance the engineering profession. It provides various services including engineering education, training, certification, and professional development opportunities for engineers across different disciplines. IEI also organizes seminars, conference, and publishes technical journals to facilitate knowledge exchange and networking among its members.

The institution of engineers (India) introductory seminar was conducted at LD College of Engineering in the Electrical department, under the guidance of Dr. Kunal Bhatt sir. The Prayer, welcome speech, and brief introduction about IEI students' chapter was given by Prof.H.N.Raval sir, Prof. V.R.Patel sir, and Prof. A.M.Upadhay sir, respectively.

The seminar was commenced with an introduction of the Institution of Engineers (India) by Prof. Hemant Raval Sir, And more remote details and statistics were conveyed by Dr. Kunal Bhatt Sir. Several benefit of said chapter were discussed and appeal was been made to be the part IEI student chapter by owning the membership at very economical fees for whole 4yr.

Topics Covered:

- Overview of Institution of Engineers (India).
- Importance of being the part of technical student chapter.
- And prompting student to be skilled engineer rather than being bookworm engineer.
