**ISA Scholarship Mentoring Session by  
Ms. Soumya Gupta  
Siemens, Germany  
(5 Times ISA Scholarship awardee)**

**1<sup>st</sup> February, 2024**

Along with many others useful programs, our department organized an expert session related on the guidance of ISA scholarship.

International society of automation provides student scholarship that are extremely important and this session showed us the path to access the same. The session was of approximately two hours.

During the session we were informed with all the minute details that we need to be aware while filling the scholarship application form. Also the expert – Miss SOUMYA GUPTA currently working at Siemens, Germany, explained us how to fill the form effectively. As she could effectively manage to attain the scholarship for five times, her experience and expertise proved extremely beneficial for each one of us.

Later, after gaining all the knowledge and methodology to fill the scholarship application we had an effective interactive session where she solved all our doubts and this session gave us a lot of clarity which will definitely help us a lot.

Lastly Manish Thakkar Sir – head of the department presented our expert with a book as a vote of thanks and a way to express gratitude on the behalf of the department for guiding the students. With this session for the day ended.

(Book presented to Ms. Soumya Gupta by Dr. Manish Thakker )
