

Report on Industrial Visit

Kiri Industries Ltd., Vatva, Ahmedabad

Date of Visit: 6th August 2025

Organized for: 3rd Semester Chemical Engineering Students

Total Participants: 37 Students

Faculty Coordinators: Prof. Piyush S. Patel and Prof. Nikita Ambegaonkar

An industrial visit to Kiri Industries Ltd., located in the Vatva, Ahmedabad, was successfully organized on 6th August 2025 for the third semester students of Chemical Engineering. A total of 37 students, accompanied by Prof. Piyush S. Patel and Prof. Nikita Ambegaonkar, participated in this educational tour.

The visit provided students with valuable exposure to real-time industrial practices and operational protocols. The team at Kiri Industries graciously facilitated a detailed walkthrough of their manufacturing units, highlighting critical components.

During the visit, students gained practical exposure to various unit processes and operations carried out in the chemical industry. They observed the use of process vessels and understood their design and functionality in different chemical reactions. The working of agitators and blenders used for effective mixing and reaction control was demonstrated. Students also learned about storage tanks and material handling systems used for raw materials and finished products. Emphasis was also placed on industrial safety practices and measures, highlighting the importance of safety protocols in plant operations.

This visit proved to be an effective learning experience, helping students relate academic concepts to industrial applications. The department appreciates the efforts of Kiri Industries Ltd. and looks forward to more such collaborative opportunities in the future.
