

SEMINAR

B.E. Semester ALL, Chemical

Name of Expert: Dr. Asit Das,
Head , Refining R&D and Process Development,
Reliance Industries Ltd.
Dr. Praveen Chintala,
General Manager,
Reliance Industries Limited

Date: 23rd February 2018

A seminar on “Revolutionary Developments and challenges in Fuel and Chemical Industry” was organized by the Chemical Department on 23rd Feb, 2018. The key speaker was Dr. Asit Das, Head, Refinery R&D and Process Development at Reliance Industries, Jamnagar. Dr. Asit Das has completed his PhD in Chemical Engg from Ghent University, Belgium. He is an authority in reaction engineering and catalyst development especially in petroleum and petrochemical processing. Dr. Das discussed the various aspects of petroleum industry and the challenges which the industry is facing. He also emphasized about the future pathway of Indian petroleum and petrochemical industry and discussed the implication of Shell gas in global petroleum industry. He also encouraged the budding engineers to take up research as a career. The seminar garnered a lot of applause from the students and faculties. The faculties had a special discussion with him afterwards with a focus on research areas in the field of reaction engineering and catalysis. He was accompanied by Dr. Praveen Chintala, General Manager at Reliance Industries Limited who also shared his expertise and enlightened the students about the needs of the industry.
