

Expert Lecture- Report

Date: 10-8-2018

An expert lecture by Dr Prakash Mehta, Director, Tatwa Technologies Ltd, was organized by the department on 10th August 2018 for the Students of semester 5th and 7th. Title of the lecture was “Application of Silane chemistry for Chemical Engineering”.

Dr Prakash Mehta talked about the basics of silane and silane chemistry which triggered the more interest amongst the students. He covered various topics of silane chemistry, its fundamentals, unique properties like mechanical strength and electrical properties, usefulness of this technology for chemical engineers, etc. He focused on the major areas of the application where silane chemistry can be used. He also pointed out the need to use silane fundamentals in chemical industries. He shared his all hard gained knowledge with students. Students asked few queries and he satisfied all the doubts raised by the students.
