

Polyacrylamide based cationic graft copolymer flocculants.

Dr. Ramesh Subramanian , Director and Associate Professor, of Laurentian University, Canada had delivered a lecture on “Polyacrylamide based cationic graft copolymer flocculants” to 3rd and 4th year students on 24/12/19. He gave a brief idea related to cationic graft copolymer flocculants and also shared the ideas to students for their Project areas.

He discussed about the environment of the colleges in Laurentian University and the education system at Laurentian University. These encouraged students to be more active and have small small projects in every semester that they feel to do in any discipline.

Dr. Ramesh Subramanian lecture helped students as well as faculties in many ways.
