LD COLLEGE OF ENGINEERING- AHMEDABAD

DATE- 13th February 2023

The visit at einfochips was organised by the LD college of engineering on 13th February. It was full day program starting from 10:00 AM to 5:00 PM.

This technical visit was divided into three parts i.e., introduction and working of the company, visit at hardware lab of company and experience hall. It was a wonderful day for all the interested student who wish to see their future carrier in core domain of electronics and communication.

Company's introduction

Introduction of the company was given by one of the manager of the company. He told us about what are the different type of services and products are provided by the company where are the various branches of the company in different parts of the world? he also told about how many employees works in the company and what other companies are linked with them. Main focus was given to designing of the chip and the testability of the chip.

Hardware lab

After that we were taken to the hardware lab. Lab manager explained the different uses of the equipment and component which were present in the lab, and also gave the different idea of spectrum analyser of 4G frequency and 12G frequency.

We noticed that interns were passionately working on the chip. It was quite motivating for us and we all got glimpses of our future in the domain of designing the chip and verification of chip.

Experience hall

At last, in Experience Hall, marketing manager explained about new electronic items which are in market or the one which are going to come in market. The company has made many electronic items which are used in many companies in foreign and also provided help in defence sector. They have worked for boss company in Bluetooth area. Right now, they are working in 3nm technology, by this we can get the idea of what will be the future of electronic in the world.

Thank you
